

Mental health and regulation

PSA research conference 2025

18 November 2025

Contents

1. Our research
2. Findings from the research
3. Gaps in the knowledge
4. Ongoing and future research
5. Conclusion

Research into mental health

Impacts of Covid-19 research

Mental health reviews

FtP research

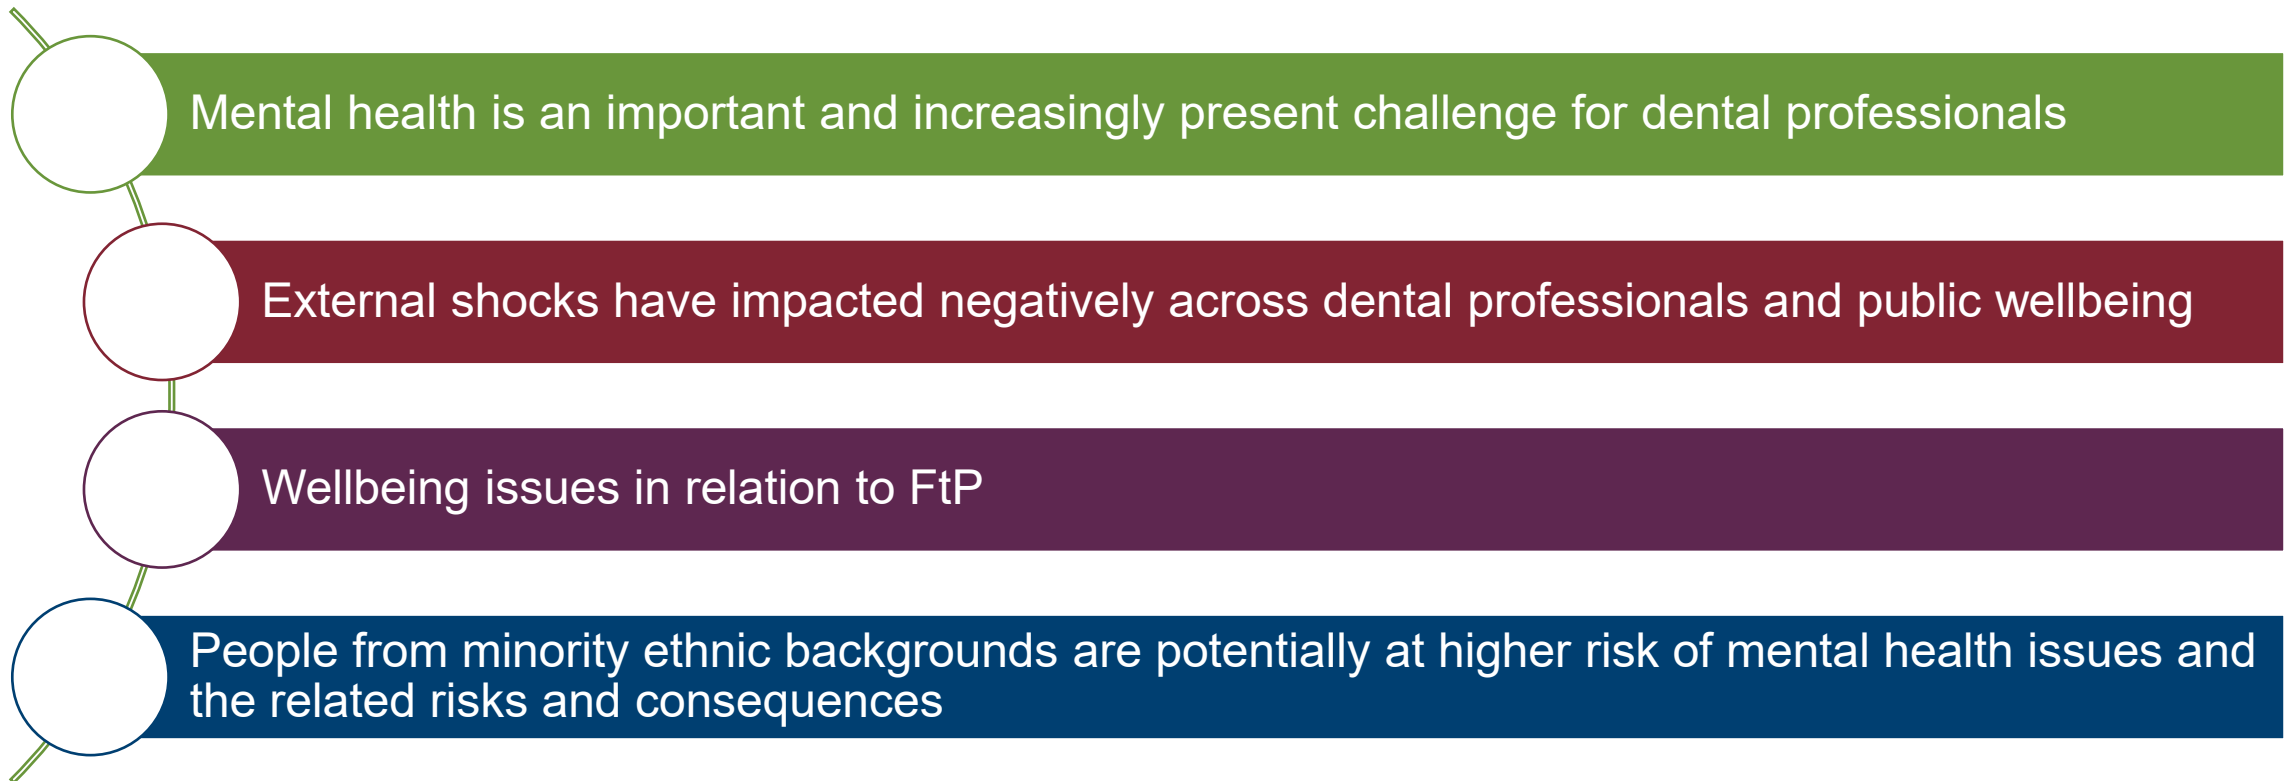

Stakeholder perceptions research

Early career dental professionals

What the research shows

Gaps in the knowledge

Research on mental health support interventions with dental professionals

Objective information on how it affects performance and patient safety.

Less research on mental health undertaken with clinical dental technicians, dental hygienists, dental nurses, dental technicians, dental therapists, and orthodontic therapists.

Ongoing and future research

Continuing to include mental health aspects in commissioned research

Rapid evidence review 2025-26

Conclusions

- Link with GDC core functions and improvements
- Informed GDC's corporate strategy
- Gaps in what we need to know
- Importance of collaboration

Thank you.
